Hatz

Key Features & Benefits

WHAT IS HATZ AI?

Hatz AI is a SOC 2-certifed enterprise-grade AI platform that gives you access to 75+ AI models, including GPT-4o, Claude, Gemini, Llama, Mistral, and more, through a single, secure, managed interface. As models are updated or new models emerge, Hatz.AI incorporates them into the platform. Unlike consumer-grade tools, Hatz is purpose-built for organizations, allowing your team access to every major AI model and create unique AI agents, all within one secure application. Explore hundreds of enterprise-grade AI tools without putting your data at risk, in an environment where we can manage and customize everything for you.

☑ 75+ AI MODELS (AND GROWING)

Access over 65 different AI models (like ChatGPT, Claude, Gemini, etc.) through a single interface without managing multiple subscriptions.

☑ ENTERPRISE-GRADE SECURITY

Your data and prompts are not used to improve or train AI models. Additionally, data is stored on secure AWS infrastructure with logical separation between different clients' data for enhanced security.

☑ ADEL AI PHONE AGENT

Build your own 24/7 AI-powered voice agent with 40+ human-like voices for customer service and intake.

☑ CREDIT-BASED PRICING

Predictable billing that scales with your business needs. Organization-wide credit pool lets your team share available credits dynamically, ensuring nothing goes to waste.

☑ 60+ THIRD-PARTY INTEGRATIONS

Hatz AI connects with over 60 external tools and services (like Gmail, Google Maps, Microsoft 365, Slack, LinkedIn, Salesforce, Perplexity, etc.) to fit into your existing workflows.

☑ AI WORKSHOP (AGENTS & AUTOMATIONS)

Hands-on guidance and pre-built solutions to help you build custom AI agents and automate repetitive tasks.

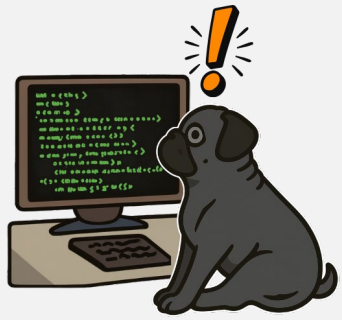

HATZ AI vs. COMPETITORS

	Hatz AI (InfoPathways)	MS Copilot	ChatGPT Teams	Claude Enterprise	Google Gemini
Number of AI Models	☑ 75+ and growing	⚠ 1 (Copilot only)	⚠ 1 (GPT only)	⚠ 1 (Claude only)	⚠ 1 (Gemini only)
SOC 2 Type II + SOC 3	☑ Certified	☑ Certified	☑ Certified	☑ Certified	☑ Certified
No Data Training Policy	☑ Contractual	⚠ Tier-dependent	⚠ Tier-dependent	☑ Contractual (Enterprise plan)	⚠ Tier-dependent
Tenant-Isolated Storage	☑ AWS Virginia	⚠ M365 tenant	⚠ OpenAI infra	⚠ Anthropic	⚠ Google infra
Licensing Model	Organization-Wide Credit Pools (flexible)	Per User license additional cost for credits	Per User license additional cost for credits	Per User license additional cost for credits	Per User license additional cost for credits
Ecosystem Dependency	☑ None — open platform	Requires M365	OpenAI only	Anthropic only	Google Workspace
AI Agents & Automation	☑ AI Workshop	⚠ Limited	☑ Workspace Agents	⚠ Limited	⚠ Limited
SMB-Focused	☑ Core market	✕ Enterprise-first	⚠ Mixed	✕ Enterprise	✕ Enterprise
Other Benefits and Drawbacks	☑ Full audit trail and compliance documentation available ☑ Not locked into one AI provider's limitations	⚠ Clients already paying Copilot often STILL use ChatGPT on the side	⚠ Per-seat model leads to wasted spend on occasional users	⚠ Enterprise pricing is opaque and often prohibitive for SMBs	⚠ Not compatible with MS365, requires Google Workspace

WHAT ABOUT CYBERSECURITY?

Zero data-training policy

Your data and prompts are not used to improve or train the AI models, keeping your information private and out of model training.

SOC 2 Type I, Type II & SOC 3 certified

Hatz has passed independent security audits confirming it meets industry-standards controls for protecting data.

AWS Virginia tenant-isolated storage

Your data is stored on secure AWS infrastructure with strict logical separation between different clients' data for enhanced security
